

SHUBHAM SINGH

Lead Software Engineer

Ahmedabad, Gujarat, India | (+91) 8511001518 | shubhamrdeveloper@gmail.com | LinkedIn: linkedin.com/in/shubhamrdeveloper | GitHub: github.com/shubhamsingh1295 | Portfolio: shubhamsingh1295.github.io

SUMMARY

Lead Software Engineer with 8+ years of experience in backend and full-stack development across Ruby on Rails, Node.js, and TypeScript. Currently leading a team of 5 engineers at Tech Holding, building multi-tenant SaaS products and AI-driven platforms in fintech, healthcare, and retail. Hands-on with AWS, GCP, microservices, large-scale system migrations, and generative AI integrations using Amazon Bedrock and LangChain.

TECHNICAL SKILLS

- Languages: Ruby, JavaScript, TypeScript, Python
- Frameworks: Ruby on Rails, Express.js, Fastify, Next.js, Flask, FastAPI
- Libraries: Prisma, Drizzle ORM, Mongoose, Sequelize, Knex.js, LangChain, jQuery
- Databases: PostgreSQL, MySQL, MongoDB, DynamoDB, Redis
- DevOps & Tools: Git, Docker, JIRA, Agile, Scrum, Terraform, Terragrunt, OpenTofu, GitHub Actions
- Cloud & Services: AWS (ECS, Lambda, SAM, S3, RDS, DynamoDB, SQS, SNS, CloudWatch, Cognito, Bedrock), GCP (Cloud Run, Pub/Sub, GKE, GCS)
- Testing: RSpec, MiniTest, Jest, Playwright
- Web Technologies: HTML, CSS, REST, WebRTC, WebSocket, OpenAPI
- AI & ML: Amazon Bedrock, LangChain, AWS Bedrock Agent Runtime, Streamlit

PROFESSIONAL EXPERIENCE

Tech Holding | Lead Software Engineer (Jul 2023 – Present), Ahmedabad (Hybrid)

- Lead a team of 5 engineers, owning the technical roadmap, sprint planning, code reviews, and stakeholder discussions across product, design, and QA.
- Mentor engineers on backend architecture and set coding standards, CI/CD practices, and architectural patterns including microservices, Domain-Driven Design, and event-driven systems.
- Built Resolve AI, a multi-tenant SaaS platform where AI agents automatically resolve Jira bug tickets by generating GitHub pull requests. Stack: Node.js, TypeScript, Fastify, React 19, PostgreSQL, Drizzle ORM, AWS Lambda/ECS, pnpm monorepo.
- Built IDCPM (Identity and Consent Preference Management), an enterprise platform with OAuth2/OIDC via ORY Hydra, Next.js 15 frontend, Fastify backend, GCP Pub/Sub webhooks, and GKE deployment using OpenTofu and Terragrunt.
- Built ViaPromeds, a full-stack healthcare SaaS using Next.js 13, Contentful CMS, Node.js/Express API, AWS Lambda functions, and payment integration with PayPal and Authorize.net, including video and face detection features.
- Developed Remit2any, a fintech API platform with 100+ endpoints covering transfers, payments, wallets, and compliance, documented in OpenAPI 3.0 with a domain-driven structure.
- Developed TheraBody GenAI, a product chatbot and recommendation engine using Amazon Bedrock, LangChain, Python/Streamlit, and AWS SAM.
- Built Redcarpet, an HR automation platform for employee onboarding/offboarding, device allocation, and software access provisioning using React, Redux Toolkit, Node.js/Express, and Google OAuth.
- Built a Live Streaming Platform with broadcaster and viewer flows using React 18, TypeScript, VideoSDK.Live, WebRTC, and a JWT-secured Node.js/Express backend.

Tech Holding | Senior Software Engineer (Feb 2022 – Jul 2023), Ahmedabad (Hybrid)

- Led Westfield's CMS migration from Rails to Node.js and TypeScript microservices, improving performance and scalability.
- Built secure, unified authentication across platforms and enabled partner integrations.
- Designed REST APIs, batch processing jobs, and data streaming apps for marketing analytics using Mulesoft and BigQuery.
- Developed smart parking systems and event sourcing platforms for real-time visitor behavior tracking.
- Maintained a Slack bot using Flask and AWS SDKs for microservice monitoring.
- Built a Facebook chatbot using AWS Lex and Lambda to automate customer interactions.
- Built ETL pipelines with Apache Beam to ingest product catalogs into GCP buckets.

Itsacheckmate | Senior Software Engineer (Jul 2021 – Feb 2022), Remote

- Built backend solutions with Ruby on Rails, integrating restaurant platforms for seamless ordering experiences.
 - Worked closely with the React frontend team to ensure smooth data flow and user experience.
-

Main Street | Consulting Software Engineer (Jan 2021 – May 2021), Remote

- Developed new features and refactored code for an estimate-based painting service platform.
 - Integrated third-party estimation engines and enhanced multi-role functionalities.
-

DRC Systems India Ltd | Senior Software Engineer (Oct 2019 – Jan 2021), Gandhinagar

- Led projects like Iris and Activate Universal, focused on loyalty systems and performance assessments.
 - Handled deployments, SQL and MongoDB reports, and client-facing modules.
-

Freelance Developer | Ruby on Rails (Oct 2017 – Sep 2019)

- Delivered multiple client projects independently, including Hensler Surgical, Virtual Insurance Tools, and Print or Buy.
 - Implemented admin panels, push notifications, appointment scheduling, and analytics dashboards.
-

EDUCATION

- B.E. in Computer Engineering, SAL Institute of Technology, Ahmedabad (2017)
 - Diploma in Computer Engineering, L.J. Polytechnic, Ahmedabad (2014)
-

CERTIFICATIONS & HIGHLIGHTS

- AWS Certified AI Practitioner
- Built an AI-powered chatbot and recommendation engine using Amazon Bedrock and LangChain (TheraBody GenAI).
- Designed a multi-tenant agentic AI platform (Resolve AI) for automated software engineering workflows.
